

Appendix A: Background, Parameters and Amounts for Funding Distribution

This appendix to this solicitation outlines the project funding amounts and proposed service areas. We used population figures from the most recent Social Security Annual Statistical Report to determine funding distribution across states and territories. The Ticket to Work and Work Incentives Improvement Act limits the resources we may expend for each award.

(A) Based on population of disabled beneficiaries.—Subject to subparagraph (B), the Commissioner shall award a grant, cooperative agreement, or contract under this section to an entity based on the percentage of the population of the State where the entity is located who are disabled beneficiaries.

(B) Limitations.—

(i) Per grant.—No entity shall receive a grant, cooperative agreement, or contract under this section for a fiscal year that is less than \$50,000 or more than \$300,000. (P. L. 106-170)

When determining award amounts, we combined the population by state of adult disabled workers and SSI blind and disabled beneficiaries. Although these figures do not include all WIPA-eligible beneficiaries, the data were readily available, and accounted for the vast majority of WIPA eligible populations. This data also permitted us to use the measure consistently across all states and territories, subject to the minimum and maximum limitations in the original legislation. Once we determined the total numbers of WIPA projects across states, we determined the available funding by beneficiary population per state. In cases where the population required more than one WIPA in a state, we divided the population amount to determine the number of projects. We then used county disability population figures to develop roughly equal contiguous recommended service areas within a state.

Requesting a service area

We strongly encourage applicants to consider the service areas outlined in this appendix. We will allow some flexibility to applicants to designate different service territories, if the applicant offers compelling justification for a change in service area boundaries. Applicants may seek to serve more than one proposed area, even areas in a different state or territory. Per P.L. 106-170, however, no single applicant, alone or subcontracting with other organizations, may receive an award greater than \$300,000.00.

Appendix: Proposed service areas and associated funding

The following pages list the proposed counties for each service area with the associated funding level. We have provided maps and descriptions separately to help applicants understand the areas involved for states with more than one proposed WIPA. Many of the areas are large, and we anticipate projects will use distance-based service methods to make it practical to serve these areas.
