

Note

Overview of Public Social Welfare Expenditures, Fiscal Year 1989

by Ann Kallman Bixby*

During fiscal year 1989, Federal, State, and local governments spent \$955.9 billion on public social welfare expenditures.¹ This amount was \$69.7 billion, or 7.9 percent, higher than the amount spent in 1988. In constant (1989) dollars, the increase was \$29.0 billion, or 3.1 percent of the 1988 figure. Table 1 shows current dollar expenditures for fiscal years from 1965 to 1989; data for years 1985-88 have been revised.

Social welfare expenditures are defined as the cost of cash benefits, services, and administration of programs operating under public law that are of direct benefit to individuals and families.

Social welfare spending accounted for 18.6 percent of the gross national product (GNP) in 1989, slightly more than the proportion in the previous year. This percentage (18-19 percent) has been typical of the 1980's with the exception of 1983, when the larger percentage of social welfare outlays represented a reaction to the recession of 1981-82.

The percent of all government spending devoted to social

welfare rose from 1988 to 1989, reaching 53.0 percent. State and local governments continued to spend proportionally more of their funds on social welfare than the Federal Government, 60.2 compared with 49.3 percent. The gap between Federal and State-local spending percentages has widened from that found in the early 1980's—averaging nearly 11 percentage points from 1984 to 1989.

The distribution of spending among the various program categories has been stable throughout the 1980's. In 1989, social insurance accounted for nearly one-half of all expenditures, education for one-fourth, and public aid for approximately one-eighth. All public health and medical expenditures combined accounted for one-fourth of social welfare expenditures in 1989.

*Division of Statistics Analysis, Office of Research and Statistics, Social Security Administration. A more detailed description of public social welfare expenditures will be published in a forthcoming issue of the **Bulletin**.

¹Revised data for years 1965–88.

²Includes expenditures under public laws and from trust fund accounts, including administration, capital outlay, and some payments outside the United States. The sum of individual categories may not equal the totals due to independent rounding.

³Includes outlays for vocational rehabilitation, institutional care, child nutrition and welfare, and social welfare expenditures not elsewhere classified.

⁴Combines health and medical programs with medical services provided in connection with social insurance, public aid, veterans' programs, and other social welfare programs.

⁵Expenditures for that part of workers' compensation and temporary disability insurance payments made through private carriers and self-insurers are omitted in computing percentages.
