

# THE SOCIAL SECURITY STATEMENT: BACKGROUND, IMPLEMENTATION, AND RECENT DEVELOPMENTS

by Barbara A. Smith and Kenneth A. Couch\*

---

*This article provides the first comprehensive description of the substantial effort and resources involved in developing and implementing the annual earnings and benefit statement that the Social Security Administration (SSA) began mailing in 2000 to all workers aged 25 or older. Details about the statement's background and implementation should be useful to researchers studying the statement's effect on workers' retirement decisions and knowledge of the program. The article also describes the suspension of the printed version of the statement in March 2011 to conserve agency funds, the launch of the online statement in May 2012, various efforts to reinstate statement mailings, and the decision to resume mailings to workers of selected ages beginning in September 2014. The article concludes by describing changes in the statement's appearance and content, the statement's relationship to SSA's strategic plans, and the surveys SSA commissioned to measure public awareness and knowledge of Social Security.*

---

## Introduction

In 1995, the Social Security Administration (SSA) began mailing annual earnings and benefit statements to workers in selected age groups. The purpose of these statements is threefold: to inform workers about their Social Security benefits, to help workers plan for their financial future, and to ensure that workers' earnings records are accurate. Initially, the statement was known as the *Personal Earnings and Benefit Estimate Statement (PEBES)* and was sent only to workers nearing retirement. By 2000, it was renamed the *Social Security Statement* (or, simply, the *Statement*) and sent to all workers aged 25 or older.<sup>1</sup> It was the largest customized mailing ever undertaken by a federal agency (SSA n.d. a).

Although the statement represented a historic effort and required substantial resources and manpower, no comprehensive description of its development and implementation exists. This article provides such a description (along with the statement's implementation schedule), which may be useful to researchers studying the statement's effect on workers' retirement decisions and knowledge of the program.

The article first describes SSA's initiatives to inform individuals about their earnings and benefits before Congress mandated an automatically issued statement. It then presents the statement's implementation schedule, as included in the authorizing legislation and as modified by SSA. It describes how the agency phased in automatic mailings and how it responded to budgetary constraints by suspending the mailing of the printed version of the statement in 2011 and launching an online version in 2012.<sup>2</sup> It also discusses the agency's decision to resume mailing the *Statement* to workers of selected ages in 2014. The article next describes how the statement's content and appearance have changed, and how the statement relates to SSA's strategic plans. It concludes

### Selected Abbreviations

OBRA	Omnibus Budget Reconciliation Act
PEBES	<i>Personal Earnings and Benefit Estimate Statement</i>
SSA	Social Security Administration

The *Bulletin* is available on the web at <http://www.socialsecurity.gov/policy/docs/ssb/>. The findings and conclusions presented in the *Bulletin* are those of the authors and do not necessarily represent the views of the Social Security Administration.

by highlighting findings of the surveys SSA commissioned to measure public knowledge and understanding of Social Security and of the *Statement* itself. Appendices present a chronology summarizing the statement's history along with samples of the *Statement* and accompanying inserts.

## **Background**

Although the statement brought earnings and benefits information directly to workers, access to earnings records had been available to workers since soon after the program began in 1935. The Social Security Act Amendments of 1939 stated that the Social Security Board (precursor to SSA) “shall establish and maintain records of the amounts of wages paid to each individual...and, upon request, shall inform any individual...of the amounts of wages of such individual and the periods of payments shown by such records at the time of such request.”<sup>3</sup> On October 8, 1940, the Social Security Board established regulations governing, among other things, the revision of wage records by individuals (SSA n.d. c).<sup>4</sup>

As a result, individuals were able to review and, where necessary, initiate corrections to their earnings records. Individuals desiring to review their earnings records would visit a local field office and fill out the postcard-sized Wage Statement Request form, providing information including Social Security number and date of birth. Upon receiving the form, SSA would mail a copy of the worker's earnings history to the address listed on the postcard. If there were any discrepancies between the SSA earnings record and the worker's personal records, the worker could visit the local SSA field office with the appropriate information—such as W-2 forms, old pay stubs, or other documentation from an employer—to correct the errors (SSAB 2009).

From the 1960s to the early 1980s, SSA considered, and in some cases implemented, programs to provide more information to workers about their benefits. In May 1962, SSA initiated the “leads” program, which involved sending letters to older insured workers who had not yet claimed benefits, to inform them of their entitlement to benefits (SSA n.d. d). Throughout the 1970s and into the early 1980s, SSA considered initiatives that would—individually or in various combinations—provide benefit estimates as well as earnings statements, provide statements to all workers instead of only those approaching retirement age, and send statements automatically instead of

only upon request (SSA 1994). However, the agency was concerned about the feasibility of such initiatives, which would break with the SSA tradition of providing benefit estimates only to those approaching benefit eligibility, and of doing so in the individualized setting of a Social Security office visit. Additionally, estimated future benefit amounts for younger workers could vary significantly from the actual amounts they would eventually receive. Finally, at that time, SSA did not have addresses for workers currently contributing payroll or self-employment taxes, making automatic mailings impossible. In the early 1980s, SSA sent benefit estimates to workers who requested them. However, because this service was not widely publicized, less than 2 percent of payroll taxpaying workers requested a benefit statement (SSAB 2009).

Meanwhile, interest grew outside the agency in having SSA provide workers with information about their Social Security benefits. For example, the National Commission on Social Security, appointed by President Carter pursuant to the 1977 Social Security Amendments, recommended in its 1981 final report that SSA provide Social Security benefit “illustrations” to workers requesting them.<sup>5</sup> The report added that distributing these benefit illustrations automatically to all covered workers would be desirable (SSA 1994).<sup>6</sup> On Capitol Hill, Senator Daniel Patrick Moynihan (D-NY) began suggesting in the 1980s that SSA send workers information on the Social Security benefits they could expect to receive.<sup>7</sup>

In 1988, interest converged from both inside and outside SSA in providing workers with information on their benefits. On August 4th, Senator Moynihan introduced S. 2684, a bill mandating that SSA issue earnings and benefit statements. That same day, Commissioner Dorcas R. Hardy announced that SSA would begin providing the *PEBES* on request.<sup>8</sup> The *PEBES* provided workers with their earnings history; the amount of Social Security taxes they paid; estimates of the benefits they would receive at the early retirement age (62), the full retirement age, and age 70; estimates of disability and survivors benefits; and descriptions of maximum earnings subject to Social Security taxes, Social Security tax rates, Social Security credits, credits for military and railroad service, and how benefit estimates were calculated.

No further action was taken on S. 2684. In January and June of 1989, Senator Moynihan again introduced bills mandating that SSA issue earnings and benefit

statements to workers. Although no action was taken on these bills, language from the June bill was inserted into the Omnibus Budget and Reconciliation Act (OBRA) of 1989, presumably by Senator Moynihan.<sup>9</sup>

Senator Moynihan expressed the rationale for this mandate when he introduced S. 212 in January 1989: “All of us pay into Social Security but rarely, until we become beneficiaries, do we ever hear from Social Security...every month, in every paycheck, we see money withheld for Social Security, but we hear nary a word from the Social Security Administration. Let us take this simple step [sending statements] to reassure Americans that Social Security will be there for them” (U.S. Congress 1989, S620). Inserting language from Senator Moynihan’s bill into OBRA 1989 ensured that workers would receive regular information on their Social Security benefits.

OBRA 1989 amended the Social Security Act to require SSA to issue what the legislation referred to as Social Security account statements according to the following schedule:

- Phase 1. Beginning no later than October 1, 1990, statements would be sent on request to eligible individuals.<sup>10</sup>
- Phase 2. No later than September 30, 1995, statements would be sent automatically to each eligible individual who had attained age 60 by October 1, 1994, who was not receiving benefits under Title II, and for whom a current mailing address could be determined.<sup>11</sup> In fiscal years 1995 through 1999, statements would be sent to each individual meeting those criteria and attaining age 60 during the year.
- Phase 3. Beginning no later than October 1, 1999, biennial statements would be sent automatically to eligible individuals who were not receiving benefits under Title II and for whom a mailing address could be determined. For individuals younger than age 50, a general description of benefits, but no actual benefit estimates, would be required.<sup>12</sup>

OBRA 1989 also specified that these statements contain the same information provided in the on-request *PEBES*: the worker’s earnings history; estimated Social Security and Medicare taxes paid; estimates of potential retirement, disability, survivors, and auxiliary benefits payable; plus a description of benefits payable under Medicare. In addition, the legislation required SSA to take “such steps as are necessary to assure that eligible individuals are informed of the availability of the statement.”

## Statement Phase-in

When OBRA 1989 was passed, SSA was already implementing Phase 1. As noted earlier, SSA had begun providing *PEBES*, on request, in August 1988. Implementing Phases 2 and 3, however, required more planning and preparation.

Based on the language in the legislation, SSA estimated that the following number of statements would be mailed out during Phases 2 and 3 (Enoff n.d.):

Fiscal year	Number to be issued	Recipient ages
1995	6.7 million	60 or older
1996	1.6 million	60
1997	1.7 million	60
1998	1.8 million	60
1999	1.8 million	60
2000	123.0 million	25 or older
2001 and later	123+ million each year	25 or older

According to the legislation, mailings in fiscal year 1995 would be sent to all individuals aged 60 or older and not yet receiving benefits. In each fiscal year 1996 through 1999, mailings would be sent only to those individuals attaining age 60. In fiscal year 2000, mailings would include initial statements to individuals between ages 25 and 60 and second (or first annual) statements to those individuals older than 60 who had received initial statements in fiscal years 1995 through 1999. In fiscal year 2001 and subsequent years, mailings would include annual statements to individuals older than 25 and initial statements to individuals reaching age 25 in that year. SSA estimated that for several years after fiscal year 2001, the number of new 25-year-olds would exceed the number of older individuals becoming beneficiaries and no longer requiring statements. Thus, SSA projected the number of *PEBES* recipients would increase during those years (Enoff n.d.).

After reviewing OBRA 1989, SSA modified several specifications, going beyond the legislative requirements. For example, SSA decided to provide projected benefit estimates to all eligible workers and not just to those aged 50 or older (SSAB 2009). SSA also decided to modify the mailing schedule so that statements would be sent to increasingly younger age groups during fiscal years 1996–1999.<sup>13</sup> Thus, the number of annual *PEBES* mailings increased gradually rather than

jumping from approximately 1.8 million for fiscal year 1999 to 123 million in fiscal year 2000 (SSA n.d. a).

Sending out more than 123 million statements is an enormous undertaking. Understandably, SSA was concerned about the resources required to send the statements automatically. In addition to the mechanisms involved with the actual mailing, SSA needed to estimate the number of requests for information or for corrections to earnings errors that might result from these mailings so that it could set up procedures to handle them. SSA also needed to arrange with the Internal Revenue Service and other agencies to get the required mailing addresses.

After many internal discussions, SSA decided to phase in the annual automatic *PEBES* by expanding and enhancing the existing procedure for producing the on-request *PEBES*. SSA would identify those individuals eligible to receive an automatic statement using its Social Security number database. The agency would procure addresses for these eligible individuals through reimbursable agreements with the Internal Revenue Service and the taxation agencies in Puerto Rico, Guam, and the U.S. Virgin Islands. SSA, using in-house system processing, would then produce information on individuals' earnings and calculate both the credits of coverage and the full range of benefit estimates. These data would be provided to a commercial vendor, who would print and mail the statements (Enoff n.d.).

A major concern for SSA was the potentially large number of general inquiries and earnings-record correction requests once *PEBES* was sent annually to all eligible recipients aged 25 or older. Responding to these inquiries and requests is very labor-intensive. Based on a preliminary survey, SSA estimated that for initial *PEBES* mailings in fiscal year 1995, the agency could expect 174,870 inquiries (2.6 percent of recipients) and 150,750 earnings-correction requests (2.3 percent). SSA estimated that handling this number of contacts would take about 900 work-years (Enoff n.d.).<sup>14</sup>

In 1994, SSA test-mailed about 600,000 *PEBES*s nationwide in order to analyze the number and types of inquiries received and plan for future *PEBES*-related workloads (Chater 1994). About 16,000 recipients also received a questionnaire asking for their reaction to receiving the *PEBES* form, and to its language and design. SSA also commissioned a series of focus groups for additional public input on *PEBES* language and design.

The transition from on-demand to automatic annual earnings and benefit statements required reorganization within SSA. When *PEBES* was sent only on request, the Office of Earnings Operations (OEO) corrected all earnings errors. With the move to automatically issued statements, error-correction capability expanded to other SSA components, including field offices, program service centers, and teleservice centers (SSA n.d. a). Similarly, when *PEBES* was only sent on request, inquiries were handled through the OEO toll-free number. However, OEO did not have the capacity to handle the volume of inquiries expected once the *PEBES* was issued automatically. Thus, SSA decided to use its National 800 Number Network to handle *PEBES* inquiries.<sup>15</sup>

SSA began automatic issuance of earnings and benefit statements in 1995, using the *PEBES* format.<sup>16</sup> SSA redesigned the form and renamed it the *Social Security Statement* in October 1999. Shown below is the final implementation schedule.

Fiscal year	Number issued <sup>a</sup>	Recipient ages
1995	7.0 million	60 or older
1996	5.5 million	58–60
1997	12.4 million	53–58
1998	20.7 million	47–53
1999	26.6 million	40–47
2000	134.7 million	25 or older
2001	135.6 million	25 or older
2002	137.9 million	25 or older

a. For fiscal years 1989 through 1995, *PEBES*s were only sent on request, and SSA received about 3.5 million requests per year. This request volume continued through fiscal year 2000, when SSA began sending the *Social Security Statement* to all workers aged 25 or older. Requests declined to 1 million in fiscal year 2001 and to 780,000 in fiscal year 2002.

SSA staggered the *Social Security Statement* mailings throughout the year. In fiscal year 2010, SSA sent over 151 million *Statements*, which equates to over 12.5 million mailed every month, or about 415,000 each day.<sup>17</sup> Workers received their *Statements* about 3 months before their birthday (SSA n.d. a).

SSA also sent special age-targeted inserts with the *Statements*. Beginning in October 2000, the first such insert, *Thinking of retiring?*, was sent to individuals aged 55 or older. It contained information about the effects of claiming Social Security benefits at age 62, at full retirement age, or at age 70, and the effects of

working after claiming benefits—and the implications of each option for the beneficiary and for the beneficiary’s survivors. The insert also contained information on applying for Medicare, and listed websites and phone numbers providing more information about Social Security benefits, retirement planning, investment options, and housing and health issues. Appendix B presents a facsimile insert.

In February 2009, SSA began sending an insert to workers aged 25 to 35, *What young workers should know about Social Security and saving* (see Appendix C). This insert described the future finances of Social Security, the nonretirement benefits provided by Social Security (such as disability and survivor benefits), and the importance of saving to supplement Social Security benefits. It also listed websites providing information about saving and investing.

### ***Recent Developments***

---

On March 29, 2011, after several years of increasing budget constraints, SSA suspended *Statement* mailings in order to conserve funds.<sup>18</sup> Shortly thereafter, the agency established an internal workgroup to develop an online version of the *Statement* that would be easily and securely accessible to the public.

The Online Statement Workgroup included representatives from each of the relevant offices in SSA. Operating under a tight deadline, the workgroup developed the online *Statement*, created a robust authentication process to prevent unauthorized access to workers’ personal information, and tested and validated both the *Statement* and the authentication process. For the authentication process, the agency reached out to privacy experts and advocacy groups for input on the best available methods to protect personal information in an electronic environment.

On May 1, 2012, SSA launched a secure and easy-to-use online version of the *Statement* to provide workers with immediate access to their earnings records, estimated benefits, and related information. Whereas the print version was mailed only to eligible workers aged 25 or older, the online *Statement* was and continues to be available to all individuals aged 18 or older.<sup>19</sup> The online *Statement* includes links to important information, such as an insert for workers aged 55 or older, and to other online services and tools. In the first week after its launch, more than 130,000 individuals visited the SSA website and viewed their online *Statements* (SSA 2012d). Online *Statements* had been viewed by 1 million visitors in less than two

months (SSA 2012a) and by nearly 3 million visitors as of the end of September 2012.<sup>20</sup> In fiscal year 2013, online *Statements* were viewed 16.9 million times, of which 7.1 million were unique visits—meaning that, on average, each visitor viewed his or her *Statement* about 2.4 times during the year. In October 2013, 1.7 million visitors viewed their online *Statements*; assuming similar usage throughout fiscal year 2014, SSA projects that online *Statements* will total more than 20 million visitors.

The status of the printed *Statement* also changed several times during 2012. SSA resumed targeted mailings on February 15, 2012, sending printed *Statements* to approximately 11.4 million eligible workers aged 60 or older (SSA 2012b). Then, on July 23, SSA resumed first-time mailings to eligible workers aged 25, sending about 1 million *Statements* to such recipients. However, on October 1, 2012, in response to an increasingly difficult budget situation, the agency suspended all *Statement* mailings, including on-request mailings.<sup>21</sup>

A Joint Explanatory Statement to the Consolidated Appropriations Act of 2014 directed SSA to “develop a plan to significantly increase the number of individuals receiving *Social Security Statements* annually, either electronically or by mail” (U.S. Congress 2014). The agency responded by establishing a workgroup to determine which workers would receive printed *Statements*, how often they would be sent, and the most effective printing and mailing procedures. In April 2014, SSA announced that it would begin mailing printed *Statements* in September to workers aged 25, 30, 35, 40, 45, 50, 55, and 60 or older who have not by then created a *my Social Security* account to access the *Statement* online. This partial restoration of mailed *Statements* was made possible by an improved budget situation.

### ***Statement Content and Appearance***

---

This section describes the statement’s substance and layout, and traces how it has changed since the initial *PEBES* release. Appendix D presents a sample of the *Statement* as it appeared in 2012, when SSA last suspended automatic mailings. The 2012 *Statement* retained the basic format that had been used since 2000. Changes introduced for the 2014 *Statement* appear in Appendices E, F, and G.

#### ***Content***

Legislation determines the basic content of the earnings and benefit statements. As noted earlier, OBRA 1989 specified that statements contain the worker’s

earnings history; the Social Security and Medicare taxes paid by the worker; an estimate of potential retirement benefits at the early retirement age of 62, at the full retirement age, and at age 70; estimates of disability, survivor, and auxiliary benefits potentially payable on the worker's account; and a description of benefits payable under Medicare.

Originally, *PEBES'* first page contained a message from the SSA commissioner. The second page provided information on the worker's earnings and on Social Security and Medicare taxes paid. The third page contained the worker's estimated retirement, disability, and survivor benefits, as well as a description of Medicare benefits. The fourth, fifth, and sixth pages provided additional information on the worker's earnings record, Social Security taxes paid, Social Security and Medicare credits, estimation of benefits, types of benefits, and the effect of working while receiving benefits.

SSA added content to the statements in 1999 and in 2006. On October 1, 1999, when SSA began sending statements to all eligible workers aged 25 or older, a new paragraph encouraged the recipient to think about the advantages and disadvantages of retiring early. A list of publications on topics related to retirement benefits also appeared. Estimated retirement, disability, and survivor benefits (and related information) now appeared before the worker's earnings history. Finally, the commissioner's message, presenting introductory information on the first page of the statement, began to appear under the title "What Social Security Means To You."

The Social Security Protection Act of 2004 mandated the addition of sections on the Windfall Elimination Provision (WEP) and the Government Pension Offset (GPO) to the *Statement* beginning in 2007.<sup>22</sup> Other changes to the *Statement* included adding the agency's website address to the first page and expanding the discussion of how benefits are calculated.

The commissioner's introductory message varies in length, language, and content from year to year. As might be expected, the message changes to reflect the environment Social Security faces. In 1988, Commissioner Hardy noted that Social Security provided more than retirement benefits, but those retirement benefits needed supplementation with savings, private pensions, other insurance, and investments. Commissioner Hardy concluded her message by saying that Social Security was financially sound.

In her 1996 message, Commissioner Shirley S. Chater expressed some concern about Social Security's future financial condition. Like Commissioner Hardy, she pointed out that Social Security provides benefits besides those for retirees, and encouraged individuals to establish other retirement savings to supplement Social Security benefits. Commissioner Chater noted that the Social Security Board of Trustees projected that trust fund resources would be adequate to pay benefits in full for more than 30 years. She added that Congress had time to make necessary changes to ensure Social Security's financial future.

Commissioner Kenneth Apfel focused more pointedly on Social Security's financial future. In his October 1, 1998 message, he wrote, "Some people are concerned that Social Security will not be there in the future," and added "we are working to resolve long-run financing issues." Commissioner Apfel's message in the October 1, 1999 *Statement*, the first annual statement, contained subsections titled "Social Security is for People of All Ages," "Work to Build a Secure Future," and "About Social Security's Future." This last subsection noted that concern for the future of Social Security stemmed from longer life expectancies, increasing numbers of retirees, and fewer workers supporting each retiree.

In 2000, Commissioner Apfel added statistics to his discussion of Social Security's future. He noted that 76 million baby boomers would begin retiring around 2010; in the next 30 years, the number of older Americans would double; in 2014, Social Security benefits paid would exceed taxes collected; and by 2034, the trust funds would be exhausted and payroll tax collections would be able to pay for only about 71 percent of benefits owed. Commissioner Apfel also recommended that *Statement* recipients ask for a copy of SSA's booklet, *The Future of Social Security*.

In 2001, Acting Commissioner Larry G. Massanari added a fourth subsection, "Social Security on the Net," to his message. It described how readers could use the agency's website (<http://www.socialsecurity.gov>) to estimate their future benefits and plan their financial future, apply for retirement benefits, subscribe to *eNews* for program and benefit updates, correct or change their name on their Social Security card, or get a replacement card.<sup>23</sup>

In 2003, Commissioner Jo Anne B. Barnhart observed that the number of Americans aged 65 or older was expected to double by the time the Social

Security Trust Fund was projected to be exhausted. Commissioner Barnhart also noted that current Social Security benefits were paid by current workers, but that in the future there would not be enough younger workers to pay all of the benefits owed to retirees. Language from previous messages was changed in small but significant ways. To sentences addressing the trust fund's future, the 2003 message added phrases such as "unless action is taken soon to strengthen Social Security." To an existing passage reading "we'll need to resolve long-range financial issues" the 2003 message added "soon." Commissioner Barnhart also noted for the first time that trust fund solvency estimates came from SSA's actuaries.

Although Commissioner Michael J. Astrue shortened the overall message in 2007, he added information on saving and investing to the "Work to Build a Secure Future" section. "About Social Security's Future" was condensed: It now provided information about Social Security being a compact between generations, the dates when benefit payments would first be drawn from the trust fund and when the trust fund would be exhausted, and the percentage of scheduled benefits that would be paid after trust fund exhaustion. The phrases introduced by Commissioner Barnhart, noted above, were dropped.

For the September 2014 reintroduction of *Statement* mailings to workers of selected ages, different versions of the first page were created to incorporate current Acting Commissioner Carolyn W. Colvin's messages for younger workers, midcareer workers, and workers nearing retirement. Although their messages differ in order to focus on issues relevant to a particular age group, the new first pages also include common elements, including remarks promoting the online *Statement* and highlighting the agency's presence on Facebook, Twitter, and YouTube. In addition, an estimate of the recipient's full retirement benefit appears prominently in all versions of the new first page. These changes will also migrate to the online *Statement*. Appendices E, F, and G provide examples of the new first pages for younger, midcareer, and older workers, respectively. Further changes to the *Statement* are planned for fiscal year 2015.

### **Appearance**

The style, design, and layout of the first *PEBES*, issued in 1988, were created by what was then known as the Office of Information, part of SSA's Office of Governmental Affairs.<sup>24</sup> *PEBES* was six pages long. The

second page contained seven columns of numbers. The first column listed each year in the individual's work history; it was followed by three columns each for Social Security and Medicare, showing maximum taxable earnings, the individual's reported earnings, and estimated taxes paid. All other pages contained single-column text.

The first *Social Security Statement*, issued October 1, 1999, reflected significant, focus group-tested design changes. The *Statement* was shortened from six to four pages, and the order of presentation changed so that information on benefits preceded information on earnings. Only two columns of numbers, representing taxed Social Security earnings and taxed Medicare earnings, were shown for each year in a worker's earnings history. The numbers now filled only one-half page, instead of one entire page as before. The *Statement* eliminated information on taxes paid in each earnings year, and now only provided cumulative lifetime Social Security and Medicare taxes paid. Most pages now had two columns of text rather than one. More white space, and greater use of different font sizes and styles, made the *Statement* easier to read.

The appearance of the *Statement* changed again with its online incarnation. Although the online *Statement's* primary features—the Commissioner's message about Social Security and the worker's estimated benefits and earnings record—are presented in the same order as on the print *Statement*, related content is accessible through links. For example, the online *Statement's* estimated benefits section provides links to information on Social Security and Medicare, things to consider before deciding to retire, and SSA publications and contacts—content that appears on the last page of the print *Statement* under "Some Facts about Social Security." Additionally, for workers in the 25–35 and 55 or older age groups, the estimated benefits section includes a link to the appropriate *Statement* insert.<sup>25</sup> While logged into his or her password-protected *my Social Security* account, any individual can also opt to view (and print) the *Statement*.

The September 2014 resumption of *Statement* mailings brings design changes to the first page of both the print and online versions. The new first page incorporates design features such as graphics, more white space, and larger print. Initially, the *Statement* will be printed in black and white only. These new design features will appear first in the print version and then in the online *Statement*.

## ***The Statement's Relationship with SSA's Strategic Plans***

---

SSA's strategic plans not only acknowledge the importance of informing the public about Social Security benefits, they specifically mention the statement.

### ***1991 Plan***

The *Social Security Strategic Plan: A Framework for the Future*, issued in September 1991, noted the significance of legislation mandating SSA to begin, in fiscal year 1995, sending personal earnings and estimated benefit statements automatically.<sup>26</sup> One of the three fundamental goals of the 1991 plan was to “instill public confidence in Social Security programs” through the provision of information to “workers and their families to make them aware of their protections under the Social Security programs and the role of Social Security in their financial future.” The 1991 strategic plan underscored the importance of a well-informed public:

Public understanding of the Social Security programs and their importance to society is basic to ensuring that the programs continue to address the social needs they were designed to address. Understanding the types of circumstances in which benefits are payable and having a general sense of benefit levels provide a context for people to plan for retirement financing and other insurance and income-supplement needs... A critical function of SSA is to make every effort to see that people are informed of their eligibility for the benefits we administer (HHS 1991).

### ***1997 Plan***

The importance of public understanding of Social Security programs was also a theme of SSA's *Strategic Plan 1997–2002: Keeping the Promise*, issued in September 1997. One of the five goals of this strategic plan was “to strengthen public understanding of the Social Security programs.” The plan discussed the importance of this goal:

One of SSA's basic responsibilities to the public is to ensure that they understand the benefits available under the Social Security programs to them individually and to the population as a whole. This enables people to make reasonable and responsible choices as they plan for their own future and as they

help the nation's leaders make decisions about the future of society (SSA 1997).

The plan stated that SSA would attain this goal if “by 2005, 9 out of 10 Americans will be knowledgeable about the Social Security programs in five important areas: basic program facts, financial value of programs to individuals, economic and social impact of the programs, how the programs are financed today, and financing issues and options.” The plan acknowledged the need for better ways to assess meeting this goal than merely counting the number of *PEBES* mailings or the percentage of individuals believing they are well informed about Social Security. SSA intended “to create a measure of the percent of individuals who are knowledgeable in each of the five subject areas as demonstrated by responses to an objective test.” To be measured, “knowledgeable” would need to be defined for each of the subject areas. Further, a testing instrument would be needed to establish a baseline knowledge level (SSA 1997).

Meeting this goal would involve developing an overall public education strategy using the media, SSA publications, schools, other public and private organizations, employers and employees, and celebrity spokespersons. *PEBES* would also play an important role: “*PEBES* issuance will remain a central strategy for helping SSA maintain the accuracy of earnings records, keeping wage earners up-to-date on their protection under Social Security, and helping wage earners, through an estimate of their future benefits, plan their financial future” (SSA 1997).

In 1998, SSA established the Public Understanding and Management System, an initiative under which six surveys were conducted between 1998 and 2004 to measure public understanding of the Social Security program and benefits. These surveys were designed to measure the effect of the broad public education strategy that included the statement. The next section discusses the surveys and their findings.

### ***2000 Plan***

Just as in the 1997 strategic plan, one of the five goals in *Mastering the Challenge: Strategic Plan FY2000–2005* was “to strengthen the public understanding of Social Security programs.” The objective remained the same—that by 2005, 9 out of 10 American adults would be knowledgeable about Social Security. However, now the agency focused on improving public knowledge in three areas it deemed especially

important: basic program facts, value of Social Security programs, and financing of Social Security programs. This was to be achieved by promoting awareness of the *Statement* and how it could be used to plan a secure financial future. Performance indicators mentioned in the plan included the percentage of the public who were knowledgeable about Social Security programs and the percentage of individuals to whom *Statements* were issued, as required by law (SSA 2000).

### **2008 Plan**

The importance of public understanding of Social Security programs remained a theme in SSA's *Strategic Plan Fiscal Years 2008–2013*. That plan acknowledged that SSA faced “limited public understanding of the role of Social Security benefits” and included an objective to “provide individuals with accurate, clear, up-to-date information.” It also noted that 147 million *Statements* were issued in fiscal year 2007. The plan contained a special initiative to encourage saving and mentioned the *Statement* as an important way to provide age-specific information useful for retirement planning. This initiative cited research showing the importance of information and awareness in improving attitudes toward saving and expanding participation in retirement savings plans, and showing that many individuals lack this information and awareness. According to that special initiative, “the agency has a responsibility to help individuals understand the role of Social Security benefits and the need for them to save as they plan for the future” (SSA 2008).

### **2014 Plan**

In *Always Serving / Forward Looking: Strategic Plan Fiscal Years 2014–2018*, the agency's focus for the *Social Security Statement* shifted. In this strategic plan, the agency mentions the online *Statement* as part of its suite of online services and encourages the public to review the *Statement* to ensure that their earnings are accurate (SSA 2014).

### ***The Statement's Effect on Public Awareness***

This section highlights the findings of surveys commissioned by SSA to assess both the public's understanding of Social Security programs and the *Statement's* effect on that understanding. In response to the 1997 strategic plan's public awareness objective (noted above), SSA commissioned the Gallup

Organization to conduct six surveys between 1998 and 2004. SSA also commissioned Abt SRBI to conduct surveys specifically on the *Social Security Statement* each year 2008–2010. With these surveys, SSA sought to monitor and improve public understanding of the *Statement* messages.

### **Gallup Surveys**

The first survey, in 1998, was a baseline study to determine what the public knew about Social Security. It found Americans relatively well informed about basic program facts. Respondents recognized the three primary benefit programs (retirement, disability, and survivor insurance); they understood the tax used to support Social Security; they knew how these taxes were being used and how benefits are calculated; and they understood the challenges to long-term program finances posed by an aging population. However, they were less informed about specific program facts: Only 38 percent knew that the full retirement age in 1998 was 65, and only 46 percent knew that the early retirement age was 62. Those who stated they had received a *PEBES* were better informed than those who did not recall receiving a statement.<sup>27</sup>

The 2001 Gallup survey found a significant increase in the number of respondents who knew about the relationship between Social Security benefits and earnings, how benefits are paid for, that benefits increase automatically as the cost of living rises, and that the full retirement age was increasing.<sup>28</sup> Slightly more than half of the respondents reported receiving a *Statement*. Respondents who reported receiving the *Statement* were more knowledgeable than those who did not.

### **Abt SRBI Surveys**

In 2008, SSA commissioned Abt SRBI to survey the public about the *Social Security Statement* and how well it provided information about SSA programs, aided financial planning, and verified earnings. A baseline survey was conducted in 2008 with follow-up surveys in 2009 and 2010. The 2010 survey found that 62 percent of respondents recalled seeing their benefit information and 45 percent recalled seeing their earnings history. Twenty-two percent of those aged 55 or older reported reading the *Thinking of Retiring?* insert. Thirty percent of all respondents and 42 percent of respondents aged 55 or older reported using the *Statement* for financial planning. Seventy percent of respondents thought the information in

the *Statement* was useful for retirement planning. Fifty-four percent expressed overall satisfaction with the *Statement's* information about savings and investment. The surveys found that the *Statement* was most effective in the verification of earnings, with about 95 percent of respondents reporting that their personal information was correct.

### ***Conclusion***

---

This article provides an overview of the *Social Security Statement*—the background behind its implementation, the phase-in process, its relationship to SSA's strategic plans, its content and appearance, and the surveys commissioned by SSA to measure the public's understanding of Social Security and of the *Statement*. This information, along with the implementation schedule, will be useful to researchers studying the *Statement's* effects on public knowledge and retirement planning.

In recent years, funding constraints and technological developments have brought major changes to the *Statement*. In February 2012, SSA resumed mailing printed *Statements* to workers aged 60 or older, following a suspension that began in March 2011 to conserve agency funds. Then, in May 2012, SSA introduced an online version of the *Statement*. The agency also made a one-time mailing of the *Statement* in July to workers aged 25 in 2012. In October 2012, SSA again suspended *Statement* mailings for budgetary reasons, and relied on the online version to provide workers with immediate access to their earnings records, estimated benefits, and other information. In September 2014, the agency resumes mailing a revised and redesigned version of the printed *Statement* to workers of selected ages.

## Appendix A

### Social Security Statement Chronology

Date	Development
1939	The Social Security Act Amendments of 1939 require the Social Security Board to maintain records of wages paid to individuals and, on request, to provide individuals with information on their wages.
1940	The Social Security Board establishes regulations governing the revision of wage records by individuals.
1962	SSA initiates the “leads” program, under which it sends information on benefit entitlements to older insured workers who have not yet claimed benefits.
1970s–early 1980s	Internal discussions at SSA on providing workers of all ages with benefit as well as earnings statements, and doing so automatically as well as on request.
Early 1980s	SSA sends benefit estimates to workers on request, under a little-publicized program.
1981	The National Commission on Social Security, appointed by President Carter, issues its final report recommending that SSA provide information on Social Security benefits to workers: at a minimum, to those who request it; ideally, to all workers automatically.
August 1988	Senator Daniel Patrick Moynihan introduces a bill mandating that SSA issue earnings and benefit statements. The same day, Commissioner Dorcas R. Hardy announces that SSA will begin providing the <i>PEBES</i> on request.
1989	OBRA 1989 amends the Social Security Act to require SSA to issue “Social Security account statements” and to begin sending them automatically according to a set schedule. OBRA also specifies the information to be included in these statements. SSA makes several important modifications to these specifications, going beyond legislative requirements.
1994	SSA begins test mailings of <i>PEBES</i> to plan for future workloads. Questionnaires and focus groups gather input and feedback on the language and design of <i>PEBES</i> .
Fiscal year 1995	SSA begins phasing in automatic mailing of earnings and benefit statements. This phase-in will continue through fiscal year 1999.
1996	SSA pretests its online <i>PEBES</i> .
1997	SSA begins national testing of online <i>PEBES</i> . Concerns raised by the media and Congress about the privacy of earnings records cause SSA to suspend online <i>PEBES</i> .
Fiscal year 2000	SSA sends 134.7 million <i>PEBESs</i> to workers aged 25 or older. In October 1999, <i>PEBES</i> is redesigned and renamed the <i>Social Security Statement</i> . Beginning in fiscal year 2000, the <i>Statement</i> is mailed to all eligible workers aged 25 or older.
October 2000	SSA begins mailing a special insert, <i>Thinking of retiring?</i> , to workers aged 55 or older.
2007	SSA adds sections to the <i>Statement</i> on the Windfall Elimination Provision (WEP) and on the Government Pension Offset (GPO) as mandated by the Social Security Protection Act of 2004.
February 2009	SSA begins mailing special inserts, <i>What young workers should know about Social Security and saving</i> , to workers aged 25 to 35.
March 2011	SSA Commissioner Astrue testifies before Congress that to conserve funds, the agency will temporarily suspend mailing the <i>Statement</i> . Work begins on developing an online <i>Statement</i> .
2012	SSA resumes annual mailings of printed <i>Statements</i> to all workers aged 60 or older in February, launches an online version of the <i>Statement</i> accessible to workers of all ages in May, conducts a one-time mailing of <i>Statements</i> to workers aged 25 in July, and suspends <i>Statement</i> mailings in October.
September 2014	SSA resumes annual mailings of printed <i>Statements</i> to workers aged 25, 30, 35, 40, 45, 50, 55, and 60 or older who have not yet established a <i>my Social Security</i> account to access their <i>Statements</i> online.

# Thinking of retiring?

[www.socialsecurity.gov](http://www.socialsecurity.gov)

## Some things to consider

Retirement can have more than one meaning these days. It can mean that you have applied for Social Security retirement benefits or that you are no longer working. Or it can mean that you have chosen to receive Social Security while still working, either full or part-time. All of these choices are available to you. Your retirement decisions can have very real effects on your ability to maintain a comfortable retirement.

If you retire early, you may not have enough income to enjoy the years ahead of you. Likewise, if you retire late, you'll have a larger income, but fewer years to enjoy it. Everyone needs to try to find the right balance, based on his or her own circumstances.

We hope the following information will help you as you plan for your future retirement and consider your retirement options.

## It's so easy to apply online for benefits

The easiest way to apply for Social Security retirement benefits is to go online at [www.socialsecurity.gov/applyforbenefits](http://www.socialsecurity.gov/applyforbenefits). If you do not have access to the Internet, you can call **1-800-772-1213** (TTY number, **1-800-325-0778**) between 7 a.m. and 7 p.m., Monday through Friday, to apply by phone. You also can apply at any Social Security office. To avoid having to wait, call first to make an appointment.

## What is the best option for you?

Everyone's situation is different. That is why Social Security has created several retirement planners to help you decide what would be best for you and your family. Social Security has an online calculator that can provide immediate and accurate retirement benefit estimates to help you plan for your retirement.

The online Retirement Estimator is a convenient, secure, and quick financial planning tool. It uses your own earnings record information, thereby eliminating any need to manually key in years of earnings information. The estimator also will let you create "what if" scenarios. You can, for example, change your "stop work" date or expected future earnings to create and compare different retirement options. To use the Retirement Estimator, go to our website at [www.socialsecurity.gov/estimator](http://www.socialsecurity.gov/estimator).

There is one more thing you should remember as you crunch the numbers for your retirement. You may need your income to be sufficient for a long time, because people are living longer than ever before, and generally, women tend to live longer than men. For example:

- The typical 65-year-old today will live to age 83;
- One in four 65-year-olds will live to age 90; and
- One in 10 65-year-olds will live to age 95.

Once you decide on the best age for you to actually retire, remember to complete your application *three months before* the month in which you want retirement benefits to begin.

## Don't forget Medicare

Even if you don't plan to receive monthly benefits, you should sign up for Medicare *three months before* reaching age 65. Otherwise, your Medicare medical insurance, as well as prescription drug coverage, could be delayed and you could be charged higher premiums. You even can apply online. Visit [www.socialsecurity.gov/medicareonly](http://www.socialsecurity.gov/medicareonly) for more information about Medicare eligibility and filing online. Also ask for *Apply Online For Medicare—Even If You Are Not Ready To Retire* (Publication No. 05-10530).

## Receiving benefits while you work

When you reach your full retirement age, you can work and earn as much as you want and still receive your full Social Security benefit payment. If you are younger than full retirement age and if your earnings exceed certain dollar amounts, some of your benefit payments during the year will be withheld.

This does not mean you must try to limit your earnings. If we withhold some of your benefits because you continue to work, we will pay you a higher monthly benefit amount when you reach your full retirement age. In other words, if you would like to work and earn more than the exempt amount, you should know that it will not, on average, reduce the total value of lifetime benefits you receive from Social Security—and may actually increase them.

Here is how this works: after you reach full retirement age, we will recalculate your benefit amount to give you credit for any months in which you did not receive some benefit because of your earnings. In addition, as long as you continue to work, we will check your record every year to see whether the additional earnings will increase your monthly benefit.

Many people can continue to work and still receive retirement benefits. If you want more information on how earnings affect your retirement benefits, ask for *How Work Affects Your Benefits* (Publication No. 05-10069), which has current annual and monthly earnings limits, and is available on our website.

## Retirement age considerations

### Full retirement age

For persons born during the years 1943-1954, the full retirement age is 66. If you were not born in this period, you can find your full retirement age on page 2 of your *Social Security Statement*.

### Retiring early

If you've earned 40 credits (credits are explained on page 2 of your *Statement*), you can start receiving Social Security benefits at 62 or at any month between 62 and full retirement age. However, your benefits will be reduced based on the number of months you receive benefits before you reach full retirement age.

If your full retirement age is 66, benefits will be reduced:  
25 percent at age 62;  
20 percent at age 63;  
13½ percent at age 64; or  
6⅔ percent at age 65.

### Delaying retirement

You may decide to wait beyond your full retirement age before

choosing to receive benefits. If so, your benefit will be increased by a certain percentage for each month you don't receive benefits between your full retirement age and age 70. This table shows the rate your benefits increase if you delay retiring.

Year of birth	Yearly increase rate
1941 - 1942	7.5%
1943 or later	8.0%

### Rules that may affect your survivor

If you are married and die before your spouse, he or she may be eligible for a benefit based on your work record. If you start benefits before your full retirement age, we cannot pay your surviving spouse a full benefit from your record. Also, if you wait until after your full retirement age to begin benefits, the surviving spouse benefits based on your record will be higher.

## Need more information?

You can find answers to frequently asked questions about Social Security, learn about factors that could affect your benefits, and much more by visiting Social Security online at [www.socialsecurity.gov](http://www.socialsecurity.gov).

If you do not have access to the Internet, you can get information about Social Security by calling **1-800-772-1213** (1-800-325-0778 for the deaf or hard of hearing) or by visiting a local Social Security office.

# What young workers should know about Social Security and saving

[www.socialsecurity.gov](http://www.socialsecurity.gov)

**S**aving for the future is important for multiple reasons. Education, buying your own home, taking a special vacation and even planning for your retirement are all good reasons to start saving early. Today's young workers can expect to spend 20 or more years in retirement, so it is important to begin your financial planning as early as possible. Here are some basic facts about Social Security and saving that can help you prepare for the future.

## Why this *Statement* is important for your financial planning

You have probably been paying into the nation's Social Security and Medicare systems since you first began working. The enclosed *Statement* is a report of what you have paid into these programs and an estimate of how much you can expect to eventually get in benefits.

You will receive a *Statement* each year about three months before your birthday. As you read through your *Statement*, you should pay close attention to a few items.

-  Check your earnings information. This will be the basis for determining how much you will receive in Social Security benefit payments.
-  If you change jobs or marital status, make sure your name and Social Security number are reported correctly on your employer's records.

## Will Social Security still be around when I retire?

Yes. The Social Security taxes you now pay go into the Social Security Trust Funds and are used to pay benefits to current beneficiaries. The Social Security Board of Trustees now estimates that based on current law, in 2041, the Trust Funds will be depleted. Because people are living longer and the birth rate is low, the ratio of workers to beneficiaries is falling. Therefore, the taxes that are paid by workers will not be enough to pay the full benefit amounts scheduled.

However, this does not mean that Social Security benefit payments would disappear. Even if modifications to the program are not made, there would still be enough funds in 2041 from taxes paid by workers to pay about \$780 for every \$1,000 in benefits scheduled.

## Social Security: more than retirement

Social Security reaches almost every family, and at some point will touch the lives of nearly all Americans. This year, more than 50 million Americans will collect nearly \$614 billion in Social Security benefits. Currently, nine out of 10 individuals age 65 and over receive benefits, and for two-thirds of the elderly, Social Security represents at least half of their income.

Like most, you probably think of Social Security as just a retirement program. However, depending on your circumstances, you may need the protection of Social Security well before retirement.

### Social Security protects you if you become disabled ...

Studies show that a 20-year-old worker has a 3-in-10 chance of qualifying for disability benefits before reaching retirement age.

### Social Security protects your family in the event of death ...

More than two million children and surviving spouses caring for children now receive survivor benefits from a deceased worker.

Page 2 of your *Statement* contains an estimate of your monthly disability benefit should you become disabled and of monthly benefits for your children and surviving spouse caring for children should you die.

*(Over)*

## Social Security is a financial foundation

- Social Security helps replace earnings during retirement. Financial planners generally agree retirees will need about 70-80 percent of preretirement earnings to enjoy a comfortable retirement. For an average worker, Social Security replaces about 40 percent of annual preretirement earnings.

## But you also should save and invest

- Since Social Security will only replace part of your lost earnings, your savings and investments play an important role in ensuring adequate income for you and your family.

## So start saving today

- The sooner you start, the more time you will have to save for retirement.

- Even setting aside a small portion of each paycheck will pay off in big dollars later: just \$25 a week invested at 5 percent interest for 40 years will grow to about \$165,000.
- Any amount you can save, even as little as \$5 a week, will add up over time.
- The easiest way to save is through your job. Ask your employer if you can participate in a retirement savings plan at work. Your employer might even match your contributions to the plan.
- If your employer does not offer a savings plan, check with a bank or other financial institution for ways to save and invest on your own.

To help determine how much you should save for retirement, go to [www.choosetosave.org](http://www.choosetosave.org) and click on the Ballpark E\$timate link. You can use the retirement benefit information from page 2 of your *Statement* when using this online calculator.

## What Social Security Means To You

This *Social Security Statement* can help you plan for your financial future. It provides estimates of your Social Security benefits under current law and updates your latest reported earnings.

Please read this *Statement* carefully. If you see a mistake, please let us know. That's important because your benefits will be based on our record of your lifetime earnings. We recommend you keep a copy of your *Statement* with your financial records.

### Social Security is for people of all ages...

We're more than a retirement program. Social Security also can provide benefits if you become disabled and help support your family after you die.

### Work to build a secure future...

Social Security is the largest source of income for most elderly Americans today, but Social Security was never intended to be your only source of income when you retire. You also will need other savings, investments, pensions or retirement accounts to make sure you have enough money to live comfortably when you retire.

Saving and investing wisely are important not only for you and your family, but for the entire country. If you want to learn more about how and why to save, you should visit [www.mymoney.gov](http://www.mymoney.gov), a federal government website dedicated to teaching all Americans the basics of financial management.

### About Social Security's future...

Social Security is a compact between generations. Since 1935, America has kept the promise of

security for its workers and their families. Now, however, the Social Security system is facing serious financial problems, and action is needed soon to make sure the system will be sound when today's younger workers are ready for retirement.

Without changes, in 2033 the Social Security Trust Fund will be able to pay only about 75 cents for each dollar of scheduled benefits.\* We need to resolve these issues soon to make sure Social Security continues to provide a foundation of protection for future generations.

### Social Security on the Net...

Visit [www.socialsecurity.gov](http://www.socialsecurity.gov) on the Internet to learn more about Social Security. You can read publications, including *When To Start Receiving Retirement Benefits*; use our Retirement Estimator to obtain immediate and personalized estimates of future benefits; and when you're ready to apply for benefits, use our improved online application—It's so easy!

Michael J. Astrue  
Commissioner

\* These estimates are based on the intermediate assumptions from the Social Security Trustees' Annual Report to the Congress.

## Your Estimated Benefits

<b>*Retirement</b>	You have earned enough credits to qualify for benefits. At your current earnings rate, if you continue working until... your full retirement age (67 years), your payment would be about.....\$ 1,619 a month age 70, your payment would be about .....\$ 2,023 a month age 62, your payment would be about .....\$ 1,113 a month
<b>*Disability</b>	You have earned enough credits to qualify for benefits. If you became disabled right now, your payment would be about.....\$ 1,441 a month
<b>*Family</b>	If you get retirement or disability benefits, your spouse and children also may qualify for benefits.
<b>*Survivors</b>	You have earned enough credits for your family to receive survivors benefits. If you die this year, certain members of your family may qualify for the following benefits: Your child.....\$ 1,131 a month Your spouse who is caring for your child.....\$ 1,131 a month Your spouse, if benefits start at full retirement age.....\$ 1,508 a month Total family benefits cannot be more than .....\$ 2,778 a month Your spouse or minor child may be eligible for a special one-time death benefit of \$255.
<b>Medicare</b>	You have enough credits to qualify for Medicare at age 65. Even if you do not retire at age 65, be sure to contact Social Security three months before your 65th birthday to enroll in Medicare.

**\* Your estimated benefits are based on current law. Congress has made changes to the law in the past and can do so at any time. The law governing benefit amounts may change because, by 2033, the payroll taxes collected will be enough to pay only about 77 percent of scheduled benefits.**

**We based your benefit estimates on these facts:**

Your date of birth (please verify your name on page 1 and this date of birth).....	April 5, 1973
Your estimated taxable earnings per year after 2013 .....	\$44,833
Your Social Security number (only the last four digits are shown to help prevent identity theft).....	XXX-XX-1234

## How Your Benefits Are Estimated

To qualify for benefits, you earn “credits” through your work — up to four each year. This year, for example, you earn one credit for each \$1,160 of wages or self-employment income. When you’ve earned \$4,640, you’ve earned your four credits for the year. Most people need 40 credits, earned over their working lifetime, to receive retirement benefits. For disability and survivors benefits, young people need fewer credits to be eligible.

We checked your records to see whether you have earned enough credits to qualify for benefits. If you haven’t earned enough yet to qualify for any type of benefit, we can’t give you a benefit estimate now. If you continue to work, we’ll give you an estimate when you do qualify.

**What we assumed** — If you have enough work credits, we estimated your benefit amounts using your average earnings over your working lifetime. For 2013 and later (up to retirement age), we assumed you’ll continue to work and make about the same as you did in 2011 or 2012. We also included credits we assumed you earned last year and this year.

Generally, the older you are and the closer you are to retirement, the more accurate the retirement estimates will be because they are based on a longer work history with fewer uncertainties such as earnings fluctuations and future law changes. We encourage you to use our online Retirement Estimator at [www.socialsecurity.gov/estimator](http://www.socialsecurity.gov/estimator) to obtain immediate and personalized benefit estimates.

We can’t provide your actual benefit amount until you apply for benefits. **And that amount may differ from the estimates stated above because:**

- (1) Your earnings may increase or decrease in the future.
- (2) After you start receiving benefits, they will be adjusted for cost-of-living increases.

(3) Your estimated benefits are based on current law. **The law governing benefit amounts may change.**

(4) Your benefit amount may be affected by **military service, railroad employment or pensions earned through work on which you did not pay Social Security tax.** Visit [www.socialsecurity.gov](http://www.socialsecurity.gov) to learn more.

**Windfall Elimination Provision (WEP)** — In the future, if you receive a pension from employment in which you do not pay Social Security taxes, such as some federal, state or local government work, some nonprofit organizations or foreign employment, and you also qualify for your own Social Security retirement or disability benefit, your Social Security benefit may be reduced, but not eliminated, by WEP. The amount of the reduction, if any, depends on your earnings and number of years in jobs in which you paid Social Security taxes, and the year you are age 62 or become disabled. For more information, please see *Windfall Elimination Provision* (Publication No. 05-10045) at [www.socialsecurity.gov/WEP](http://www.socialsecurity.gov/WEP).

**Government Pension Offset (GPO)** — If you receive a pension based on federal, state or local government work in which you did not pay Social Security taxes and you qualify, now or in the future, for Social Security benefits as a current or former spouse, widow or widower, you are likely to be affected by GPO. If GPO applies, your Social Security benefit will be reduced by an amount equal to two-thirds of your government pension, and could be reduced to zero. Even if your benefit is reduced to zero, you will be eligible for Medicare at age 65 on your spouse’s record. To learn more, please see *Government Pension Offset* (Publication No. 05-10007) at [www.socialsecurity.gov/GPO](http://www.socialsecurity.gov/GPO).

## Your Earnings Record

Years You Worked	Your Taxed Social Security Earnings	Your Taxed Medicare Earnings
1989	1,489	1,489
1990	2,663	2,663
1991	4,483	4,483
1992	6,221	6,221
1993	7,491	7,491
1994	9,224	9,224
1995	11,897	11,897
1996	14,677	14,677
1997	17,434	17,434
1998	20,071	20,071
1999	22,827	22,827
2000	25,588	25,588
2001	27,576	27,576
2002	29,004	29,004
2003	30,772	30,772
2004	33,097	33,097
2005	35,102	35,102
2006	37,501	37,501
2007	39,927	39,927
2008	41,487	41,487
2009	41,446	41,446
2010	42,973	42,973
2011	44,833	44,833
2012		Not yet recorded

You and your family may be eligible for valuable benefits:

When you die, your family may be eligible to receive survivors benefits.

Social Security may help you if you become disabled—even at a young age.

A young person who has worked and paid Social Security taxes in as few as two years can be eligible for disability benefits.

Social Security credits you earn move with you from job to job throughout your career.

### Total Social Security and Medicare taxes paid over your working career through the last year reported on the chart above:

Estimated taxes paid for Social Security:

You paid: \$32,239  
Your employers paid: \$33,994

Estimated taxes paid for Medicare:

You paid: \$7,955  
Your employers paid: \$7,955

**Note: In 2012, you paid 4.2 percent in Social Security taxes on your salary (up to \$110,100) and 1.45 percent in Medicare taxes on your entire salary. Your employer paid 6.2 percent in Social Security taxes and 1.45 percent in Medicare taxes for you. If you are self-employed, you paid the combined employee and employer amount of 10.4 percent in Social Security taxes on your net earnings (up to \$110,100) and 2.9 percent in Medicare taxes on your entire net earnings.**

## Help Us Keep Your Earnings Record Accurate

You, your employer and Social Security share responsibility for the accuracy of your earnings record. Since you began working, we recorded your reported earnings under your name and Social Security number. We have updated your record each time your employer (or you, if you're self-employed) reported your earnings.

Remember, it's your earnings, not the amount of taxes you paid or the number of credits you've earned, that determine your benefit amount. When we figure that amount, we base it on your average earnings over your lifetime. If our records are wrong, you may not receive all the benefits to which you're entitled.

**Review this chart carefully** using your own records to make sure our information is correct and that we've recorded each year you worked. You're the only person who can look at the earnings chart and know whether it is complete and correct.

Some or all of your earnings from **last year** may not be shown on your *Statement*. It could be that we still were

processing last year's earnings reports when your *Statement* was prepared. Your complete earnings for last year will be shown on next year's *Statement*. **Note:** If you worked for more than one employer during any year, or if you had both earnings and self-employment income, we combined your earnings for the year.

**There's a limit on the amount of earnings on which you pay Social Security taxes each year.** The limit increases yearly. Earnings above the limit will not appear on your earnings chart as Social Security earnings. (For Medicare taxes, the maximum earnings amount began rising in 1991. Since 1994, **all** of your earnings are taxed for Medicare.)

**Call us right away at 1-800-772-1213** (7 a.m.–7 p.m. your local time) if any earnings for years **before last year** are shown incorrectly. Please have your W-2 or tax return for those years available. (If you live outside the U.S., follow the directions at the bottom of page 4.)

## Some Facts About Social Security

### About Social Security and Medicare...

Social Security pays retirement, disability, family and survivors benefits. Medicare, a separate program run by the Centers for Medicare & Medicaid Services, helps pay for inpatient hospital care, nursing care, doctors' fees, drugs, and other medical services and supplies to people age 65 and older, as well as to people who have been receiving Social Security disability benefits for two years or more. Medicare does not pay for long-term care, so you may want to consider options for private insurance. Your Social Security covered earnings qualify you for both programs. For more information about Medicare, visit [www.medicare.gov](http://www.medicare.gov) or call **1-800-633-4227** (TTY **1-877-486-2048** if you are deaf or hard of hearing).

**Retirement** — If you were born before 1938, your full retirement age is 65. Because of a 1983 change in the law, the full retirement age will increase gradually to 67 for people born in 1960 and later.

Some people retire before their full retirement age. You can retire as early as 62 and take benefits at a reduced rate. If you work after your full retirement age, you can receive higher benefits because of additional earnings and credits for delayed retirement.

**Disability** — If you become disabled before full retirement age, you can receive disability benefits after six months if you have:

- enough credits from earnings (depending on your age, you must have earned six to 20 of your credits in the three to 10 years before you became disabled); and
- a physical or mental impairment that's expected to prevent you from doing "substantial" work for a year or more *or* result in death.

If you are filing for disability benefits, please let us know if you are on active military duty or are a recently discharged veteran, so that we can handle your claim more quickly.

**Family** — If you're eligible for disability or retirement benefits, your current or divorced spouse, minor children or adult children disabled before age 22 also may receive benefits. Each may qualify for up to about 50 percent of your benefit amount.

**Survivors** — When you die, certain members of your family may be eligible for benefits:

- your spouse age 60 or older (50 or older if disabled, or any age if caring for your children younger than age 16); and
- your children if unmarried and younger than age 18, still in school and younger than 19 years old, or adult children disabled before age 22.

If you are divorced, your ex-spouse could be eligible for a widow's or widower's benefit on your record when you die.

**Extra Help with Medicare** — If you know someone who is on Medicare and has limited income and resources, extra help is available for prescription drug costs. The extra help can help pay the monthly premiums, annual deductibles and prescription co-payments. To learn more or to apply, visit [www.socialsecurity.gov](http://www.socialsecurity.gov) or call **1-800-772-1213** (TTY **1-800-325-0778**).

### Receive benefits and still work...

You can work and still get retirement or survivors benefits. If you're younger than your full retirement age, there are limits on how much you can earn without affecting your benefit amount. When you apply for benefits, we'll tell you what the limits are and whether work would affect your monthly benefits. When you reach full retirement age, the earnings limits no longer apply.

### Before you decide to retire...

Carefully consider the advantages and disadvantages of early retirement. If you choose to receive benefits before you reach full retirement age, your monthly benefits will be reduced.

To help you decide the best time to retire, we offer a free publication, *When To Start Receiving Retirement Benefits* (Publication No. 05-10147), that identifies the many factors you should consider before applying. Most people can receive an estimate of their benefit based on their actual Social Security earnings record by going to [www.socialsecurity.gov/estimator](http://www.socialsecurity.gov/estimator). You also can calculate future retirement benefits by using the Social Security Benefit Calculators at [www.socialsecurity.gov](http://www.socialsecurity.gov).

Other helpful free publications include:

- *Retirement Benefits* (No. 05-10035)
- *Understanding The Benefits* (No. 05-10024)
- *Your Retirement Benefit: How It Is Figured* (No. 05-10070)
- *Windfall Elimination Provision* (No. 05-10045)
- *Government Pension Offset* (No. 05-10007)
- *Identity Theft And Your Social Security Number* (No. 05-10064)

We also have other leaflets and fact sheets with information about specific topics such as military service, self-employment or foreign employment. You can request Social Security publications at our website, [www.socialsecurity.gov](http://www.socialsecurity.gov), or by calling us at **1-800-772-1213**. Our website has a list of frequently asked questions that may answer questions you have. We have easy-to-use online applications for benefits that can save you a telephone call or a trip to a field office.

You may also qualify for government benefits outside of Social Security. For more information on these benefits, visit [www.govbenefits.gov](http://www.govbenefits.gov).

---

**If you need more information**—Contact any Social Security office, or call us toll-free at **1-800-772-1213**. (If you are deaf or hard of hearing, you may call our TTY number, **1-800-325-0778**.) If you have questions about your personal information, you must provide your complete Social Security number. If you are in the United States, you also may write to the Social Security Administration, Office of Earnings Operations, P.O. Box 33026, Baltimore, MD 21290-3026. If you are outside the United States, please write to the Office of International Operations, P.O. Box 17769, Baltimore, MD 21235-7769, USA.

Your payment would be about

## Your Social Security Statement

Your *Social Security Statement* shows how much you have paid in Social Security and Medicare taxes. It explains about **how much you would get** in Social Security benefits when you reach full retirement age. If you become disabled and unable to work, you may be eligible for disability benefits. In addition, if the family members who depend on you outlive you, they may be eligible for survivor benefits.

Take a look at your earnings. Your earnings determine how much you get in benefits. **If you find an error**, please **let us know right away**.

Social Security benefits are **not intended to be your only income source when you retire**. On average, Social Security will replace about 40 percent of your annual pre-retirement earnings. You will need other savings, investments, pensions, or retirement accounts to live comfortably. Use this *Statement* as a tool for planning your financial future.

To see your *Statement* online anytime, create a **my Social Security account** at [socialsecurity.gov/myaccount](http://socialsecurity.gov/myaccount).

A handwritten signature in cursive script that reads 'Carolyn W. Colvin'.

## Your Social Security Statement

Your *Social Security Statement* tells you about **how much you or your family would receive** in disability, survivor, or retirement benefits. It also includes our record of your lifetime earnings. Check out your earnings history, and **let us know right away if you find an error**. This is important because we base your benefits on our record of your lifetime earnings.

Social Security benefits are not **intended to be your only source of income when you retire**. On average, Social Security will replace about 40 percent of your annual pre-retirement earnings. You will need other savings, investments, pensions, or retirement accounts to make sure you have enough money to live comfortably when you retire.

To view your *Statement* online anytime, create a **my Social Security account** at [socialsecurity.gov/myaccount](http://socialsecurity.gov/myaccount).

## Notes

*Acknowledgments:* The authors are indebted to Beatrice Dubin and Angela Jaffee, for providing much of the background material for this article; to Phil Gambino, Patricia Martin, John Phillips, and David Weaver, for their thoughtful and substantive comments and suggestions; and to Larry DeWitt, Joann Sim, and Rusty Toler, who contributed in both regards.

<sup>1</sup> In this article, the capitalized term “*Statement*” refers exclusively to the *Social Security Statement*, while “statement” refers generically to both the *PEBES* and the *Social Security Statement*.

<sup>2</sup> To access his or her online *Statement*, an individual must create a [my Social Security](http://www.socialsecurity.gov/mystatement/) account. Information on creating this account is available at <http://www.socialsecurity.gov/mystatement/>.

<sup>3</sup> The original Social Security Act of 1935 contained no reference to earnings records.

<sup>4</sup> The Social Security Board was established by the Social Security Act of 1935 and was composed of three members appointed by the President. In 1946, the SSA, with a single Commissioner, replaced the Board (SSA n.d. b).

<sup>5</sup> The National Commission on Social Security is not to be confused with the National Commission on Social Security Reform (informally known as the Greenspan Commission after its Chairman). The latter was appointed by Congress and President Reagan in 1981 and delivered its report in 1983. For additional information on the National Commission on Social Security, see <http://www.socialsecurity.gov/history/reports/80commission.html>. For additional information on the National Commission on Social Security Reform, see <http://www.socialsecurity.gov/history/reports/gspan.html>.

<sup>6</sup> The report noted that private pension plans were required by the Employee Retirement Income Security Act to provide annual information to all covered employees on their accrued pension benefits, including projected Social Security benefits for those plans closely coordinated with Social Security. Thus, the National Commission on Social Security stated that it was “only reasonable” for SSA to provide similar information.

<sup>7</sup> SSA historian Larry DeWitt, e-mail response to third-party query, March 11, 2003.

<sup>8</sup> There is disagreement between the *Congressional Record*, in which Moynihan states that both these events took place on August 4th, and the 2009 Social Security Advisory Board report, which states that SSA began providing statements on August 8th.

<sup>9</sup> SSA historian Larry DeWitt, e-mail response to third-party query, March 11, 2003.

<sup>10</sup> Eligible individuals were defined as those having a Social Security number, aged 25 or older, and having wages or net earnings from self-employment.

<sup>11</sup> Title II of the Social Security Act pertains to Federal Old-Age, Survivors, and Disability Insurance (OASDI) benefits. These are benefits paid to retired or disabled workers and their families, and to the families of deceased workers.

<sup>12</sup> OBRA 1990 included a superseding requirement that SSA send the statement annually rather than biennially. It also directed the Internal Revenue Service, upon written request of the SSA commissioner, to provide taxpayer addresses to SSA for use in statement mailings.

<sup>13</sup> SSA also considered other options to deal with the large number of mailings that would be required in fiscal year 2000. These options included extending the implementation schedule beyond fiscal year 2000 or sending out statements every 2 or 3 years rather than annually. Because both of these options would have required supporting legislation, SSA instead chose to mail statements to increasingly younger groups of workers in fiscal years 1996–1999 (Enoff n.d.).

<sup>14</sup> However, surveys commissioned by SSA in 2008–2010 would find that only 5 percent of statement recipients had ever found an error in the amount of earnings reported.

<sup>15</sup> Over the years the 800 number menu has expanded to allow callers to select recorded messages on frequently requested topics—for example, why did I get this statement, where did you get my address, how do I request a new statement, and how do I correct a Social Security card. The SSA website also answers frequently asked questions (SSA n.d. a).

<sup>16</sup> As SSA phased in automatic mailing of earnings and benefit statements, it began investigating ways to put *PEBES* online. Because it was concerned about the privacy risks of using the Internet to transmit personal data, the agency instituted procedures to mitigate these risks. In fall 1996, SSA pretested the online *PEBES* with a small number of users, who reacted very positively to having online access to their earnings and benefits information. In March 1997, SSA began national testing of its online *PEBES*. Within days, news media and members of Congress expressed concerns about privacy risks. On April 9, 1997, SSA announced that it was suspending its online *PEBES* to get advice on how to provide this service while protecting the privacy of personal data. Acting Commissioner John Callahan stated that a more modest and secure version of the online *PEBES* would be rolled out by the end of the year. This new version would enable individuals to get online estimates of their retirement benefits; however, the underlying information on earnings and tax histories would only be sent by regular mail (Tumin 1998).

<sup>17</sup> Preparing and mailing the *Statements* costs about \$70 million a year.

<sup>18</sup> The agency based its decision to suspend *Statement* mailings on determinations by the Department of Justice’s Office of Legal Counsel and the Government Accountability Office’s Comptroller General that agencies reasonably anticipating a shortfall in their appropriations have both “the authority and duty to curtail or discontinue programs

and activities, including activities required by statute” (SSA 2012c).

<sup>19</sup> In order to view their online *Statements*, individuals must provide personal information that matches information already on file with SSA. The agency also uses Experian, an external authentication service provider, for additional verification that includes answering security questions about financial transactions and accounts that Experian has on file. Individuals who, for any reason, cannot complete the verification process may request that SSA mail them a printed *Statement* or may visit a local Social Security office for help in creating an account and viewing the online *Statement*.

<sup>20</sup> However, these are not necessarily unique visits. Some individuals may have viewed their online *Statements* multiple times.

<sup>21</sup> In July 2013, the agency resumed on-request mailings to those individuals who failed electronic authentication to [my Social Security](#).

<sup>22</sup> The act also required SSA to send a modified *Statement* to noncovered employees describing the potential reduction of Social Security benefits resulting from receipt of a pension from noncovered employment. WEP and GPO, complex and not easily understood provisions, apply to less than 3 percent of Social Security beneficiaries. In 2007, more than 49 million individuals received Social Security benefits, of whom only about 440,000 individuals were affected by GPO and just over 880,000 were affected by WEP (SSAB 2009).

<sup>23</sup> Three surveys commissioned by SSA in 2008–2009 showed that between 30 percent and 38 percent of *Statement* recipients first learned of online claim filing by reading the *Statement*.

<sup>24</sup> Larry DeWitt, e-mail response to third-party query, November 1, 2004. The Office of Information is now the Office of Communications. The Office of Governmental Affairs is now the Office of Legislation and Congressional Affairs. In SSA’s current organizational structure, these are two separate and distinct offices.

<sup>25</sup> The online *Statement* also includes links to SSA’s online tools for estimating and applying for retirement benefits.

<sup>26</sup> This was SSA’s second strategic plan. The first was issued in 1988, before legislation mandated *PEBES*.

<sup>27</sup> However, at that time, many recipients would have received their *PEBES* on request, meaning that they were motivated enough to ask for this information. Individuals aged 47 or older would have received at least one automatically mailed *PEBES*. Thus, *PEBES*’ true effect is difficult to determine.

<sup>28</sup> The questions asked in Gallup’s 2003 and 2004 surveys were so different from those in the previous surveys that their results are not comparable to the earlier ones.
