

ACTUARIAL NOTE

NUMBER 41
MARCH 1968

U.S. DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE
SOCIAL SECURITY ADMINISTRATION

ILLUSTRATIVE TOTAL MONTHLY FAMILY BENEFITS UNDER THE 1967 AMENDMENTS

By Jane M. Ceccarelli
Office of the Actuary

This note presents a table showing the amounts of monthly family benefits payable under the Old-Age, Survivors, and Disability Insurance system to various family groups, for each possible average monthly wage.¹ The monthly benefit for each beneficiary is determined by taking specified percentages of the primary insurance amount (PIA), which is shown in a benefit table in the law and is based approximately on the formula: 71.16% of the first \$110 of average monthly wage, plus 25.88% of the next \$290, plus 24.18% of the next \$150, plus 28.43% of the next \$100. The minimum PIA is \$55. Basic individual benefits, as percentages of the PIA, are as follows:

Beneficiary	Benefit as Percent of PIA
<i>Life Benefits</i>	
Retired or disabled worker	100%
Wife (or husband) ²	50
Child	50
<i>Death Benefits</i>	
Widow (or widower or parent)	82½%
Child	75
Mother of entitled child	75

Retired workers aged 62-64 are eligible for benefits but with a permanent reduction of ⅓ of 1% in the PIA for each month under age 65 at the time they become entitled to benefits (at age 62 the benefit is 80% of PIA). The amount of this reduction (or any reduction) is rounded to the next lower multiple of 10 cents, if it is not a multiple of 10 cents.

Wives (or dependent husbands) aged 62-64 are eligible for benefits but with a permanent reduction of ⅔ of 1% in the basic benefit for each month under age 65 at the time they become entitled to benefits (at age 62 the benefit is 37½% of PIA). No such reduction applies in the case of a wife who is caring for a child entitled to benefits unless the child is a student beneficiary.

Widows aged 60-61 are eligible for benefits but with a permanent reduction of ⅓ of 1% in the basic benefit for each month under age 62 at the time they become entitled to benefits

(at age 60 the benefit is 71½% of PIA). No reduction below 75% of PIA is made in the case of a widow who is caring for a child entitled to benefits unless the child is a student beneficiary.

Disabled widows (or dependent widowers) aged 50-61 are eligible for benefits but with a permanent reduction of ⅓ of 1% in the basic benefit for each month under age 62 and an additional permanent reduction of ⅔ of 1% in the basic benefit for each month under age 60 at the time they become entitled to benefits (at age 50 the benefit is 50% of PIA). The following table shows the percentage that can be applied to the widow's benefit at age 60 to obtain the approximate disabled widow's (or dependent widower's) benefit payable at exact ages 50-59.

Age in month of entitlement	Percentage applied to widow's benefit at age 60
59	97.0
58	94.0
57	91.0
56	88.0
55	85.0
54	82.0
53	79.0
52	75.9
51	72.9
50	69.9

For example, a disabled widow who becomes entitled to a benefit at age 55, and whose benefit is based on her deceased husband's average monthly wage of \$300, receives approximately \$77 per month (85% x \$91). The benefit at age 50 is equal to 50% of the deceased husband's PIA, except in those cases where the minimum benefit applies (husband's PIA under \$66.70). Since the law provides that a minimum basic benefit of \$55 is payable to a sole *survivor*, the minimum benefit payable to a sole surviving disabled widow (or dependent widower) at age 50 is \$33.40, which exceeds 50% of PIA.

The maximum family benefit—as shown in the benefit table in the law—is approximately equal to 80% of the first \$436 of average monthly wage, plus 40% of the remainder, but it is not less than 150% of the PIA.

In determining the amount of the monthly

¹ For a comparison with the 1965 Amendments, see Actuarial Note, Number 25, December 1965.

² Benefit is subject to a maximum of \$105 per month.

family benefit, it is first necessary to compute separately the benefit for each entitled beneficiary in the family, rounding each to the next higher multiple of 10 cents, if it is not a multiple of 10 cents. The individual benefits are then added to arrive at a total family amount.

However, if the total family amount so derived is greater than the maximum family benefit shown in the benefit table, the amount paid to each secondary beneficiary must be reduced proportionately. No reduction is made in the benefit payment for an entitled worker, but only in the payments for his dependents or for his survivors. For example, assume that the

PIA of a worker age 65 with a wife and one child is \$107.70. His benefit is \$107.70, and the benefit for his wife and child is 50% of \$107.70 or \$53.85 each, which is rounded to \$53.90. This gives a family total of \$215.50, whereas the maximum family benefit shown in the benefit table is \$180.00. The worker's benefit is not reduced; therefore, the wife and child may receive only \$72.30 altogether. Each would receive one-half of \$72.30, or \$36.15, which is rounded up to the next higher multiple of 10 cents, or \$36.20, giving a total family benefit of \$180.10, or 10 cents more than the maximum shown in the benefit table.

TOTAL MONTHLY FAMILY BENEFITS

Average Monthly Wage	Disabled Worker, or Retired Worker Aged 65 or Over at Time of Retirement				Retired Worker Aged 62 at Time of Retirement				Survivor Benefits						
	Worker Alone	Worker with Spouse Claiming Benefit at		Worker, Wife and 1 Child	Worker Alone	Worker with Spouse Claiming Benefit at		Worker, Wife and 1 Child	Widow Claiming Benefit at		One Child	Widow and One Child	Mother and		Maximum Family Benefit
